The Song make me cry :((I like that song :)

Indo : Lagunya membuatku menangis. :((I like that song :). A game with great humor and a somber story which makes you want to feel

and experience each memory it shows.

This game is really worth it , it has a driven story which makes you want to listen and understand it.

The music perfectly builds up the ambience for you to piece up the moments.

Realistic dialogue this game does not hold back on humor.

10/10 will make you feel.. I just listened to this soundtrack while going out for a walk; The world has never felt more beautiful, and I have never felt more free.. buy this now. A lovely soundtrack to go with a brilliant game.. Buy this soundtrack in the bundle, because after beating the game you are going to want to do it anyways, trust me.

Gorgeously put together, each song will bring you back to a moment in the game, perfectly capturing that moment again in your memories.. Get this if you want feels.. dude.... i'm not one of those people that are easily moved, yet somehow the story of this game did. If you are a person that cries easily, and plan to play this game, buy it, download it, go get some tissues and start it.

In the other hand, the gameplay is not the focus of this game, and it doesn't need to be, but if you don't like reading, and some pretty basic puzzles, you may not be so interested in this game, yet i highly recommend trying it.

The music is beautiful, the character development is real, and just when you start tying all the pieces together, you will feel it, feel what you ask? EVERYTHING!

In conclusion, dem feels, dat game and, long live the platypus. (you'll get it later)

One of the most powerful points of *To the Moon* is its music you won't regret buying this along with the game or as itself. It's worth it if you enjoyed the music of the game. One of the best OSTs in the gaming industry. Simple as that. I'll be honest I was never going to play *To the Moon* considering its graphics and gameplay. Then I heard this OST on YouTube. I simply loved it. This OST made me consider playing the game. And then I loved the game!! Just get this OST and also the game. Both of them need your love!!. Amazing soundtrack, worth every cent!. DLC verdict: Get it on sale OR Get it in a bundle

Comment:

If you liked the vibe and feel of the game soundtrack you will want this. While the price is a bit high there is a base game + soundtrack bundle you can get. If you already have the game I recommend to wait for a sale before getting this. Optionally, go for the whole 5-year anniversary bundle.

If you liked this DLC review you can find more in my [Review Corner](#). [The only soundtrack I've ever bought.. The soundtrack of To the Moon is excellent, in my opinion, and I really recommend getting this if you enjoyed the game. Plenty of good tracks in it, including the piano ones, which are the best. It comes in both MP3 and FLAC format, and buying it is another way of supporting the devs.](#)

[I recommend it.. So heartbreakingly sad, yet so breathtakingly beautiful. Not much more I can say.. One of the most intriguing, fun games I've played. For those who are used to fast paced action, this game is very different to play. What it lacks in 'action' it more than makes up with puzzle solving and how it portrays people and convey feelings, ethics, morale. The music is beautiful and fit so perfectly with the story. I promise that if you play the game to the end you will feel happy, even though it seems to be so much heart ache, and you will close it with teary eyes and a smile on your face.. I really loved *To the Moon* and the music played in my mind for weeks after finishing the game. I finally decided to buy the soundtrack because it was available and I loved the music. I used to play other games, listening to "For River" over and over again. I'm glad I bought it.. the best game music I've ever heard, way better than many music of other fields!](#)
